INTENSIVE

TARGETED

systems with strong academic foundations, we create an inclusive environment where diversity is valued and every student can thrive. At the heart of our model are

Through

combining

behaviour and support

authentic relationships which are the foundation for genuine growth. When students feel respected, supported, and connected, they are empowered to become assessment-literate learners who take

UNIVERSAL ownership of their progress. Through our MTSS diamond, we work together to continually improve learning, nurture potential, and build a culture of belonging for all.

Caloundra SHS MTSS model is represented as a diamond, not a triangle, to show that students are never fixed within a single tier of support. Instead, they access different levels of support as their needs and goals evolve. This approach ensures that every young person is seen as an individual learner, supported through targeted teaching, extension opportunities, and support programs that respond to their individual circumstances.
